

REGULAR AND HIGH PERFORMANCE HEAVY DUTY 2-4 BAND**H I G H P E R F O R M A N C E T R A N S M I S S I O N P A R T S****FEATURES & BENEFITS:**

- **Sonnax offers new Alto bands with Kevlar® lining for street strip applications**
- **Thicker case anchor design reduces band failures**

**Part No.****77700-01***(regular-red)***Part No.****77700-01K***(Kevlar®)**1 Band***PART SUMMARY**

Sonnax bands **77700-01** and **77700-01K** are 15% wider (0.34") than the OEM band, provide 15% more holding capacity, and are engineered for racing and high performance applications. These bands are also ideally suited for 4x4, heavy duty and commercial use. The Sonnax band is entirely a drop-in swap with no modifications to the drum required.

The regular lining for high performance street applications is designed for high torque application. The high performance racing Kevlar® lining provides very positive engagement, which is likely too aggressive for street use. Both street and racing bands feature a 60% thicker case anchor design for harsh and severe conditions, reducing the chance of band failure.
