

VBX-ValveBody Xpress™

## E40D

We stock 3 different types of E40D Valve Bodies. Each model varies, depending upon casting numbers located on the Main Valve Body and the Accumulator Body. (Please See **RED ARROWS** above for location of casting numbers.)

Model year 1989 should have an E9 casting number on both the Main Valve Body and the Accumulator Body.

Model years 1990-1995 should have either an F0 or an F1 casting number on the Main Valve Body and an E9 casting number on the Accumulator Body.

Model years 1996-1998 should have an F6 casting number on both the Main Valve Body and the Accumulator Body.

**PLEASE OBTAIN CORRECT CASTING NUMBERS BEFORE ORDERING!**

★ If you have a later model year and are uncertain as to whether you have an E40D or a 4R100, please count the check balls located between the Sub Valve Body and the Main Valve Body. An E40D will have 5 check balls, while a 4R100 will only have 4!
