

# 28080K

## POWERGLIDE OUTPUT SHAFT SUPPORT

H I G H   P E R F O R M A N C E   T R A N S M I S S I O N   P A R T S

### FEATURES & BENEFITS:

- Utilizes a roller bearing for low friction and longer life
- Made from 6061-T6 billet aluminum
- Gasket is included (Sonnax P/N 13306)

### Part No.

**28080K**

1 Output Shaft Support

1 Gasket

### PART SUMMARY

Sonnax offers a high strength replacement for the stock Powerglide output shaft support, made from high strength 6061-T6 billet aluminum to ensure rigidity where it is needed most. This replacement is purposely built for racing, eliminating the provisions for the governor. A high quality pre-installed roller bearing keeps friction losses to a minimum, while the billet aluminum construction lowers the weight dramatically. Especially designed for use in Powerglide transmissions bolted to high horsepower engines. The **28080K** Powerglide Output Support Shaft can be used with both long and short OEM and aftermarket tailshaft housings to allow for use in almost any drag racing application.

This true "bolt-on" modification for the popular Powerglide transmission can benefit both bracket ET and professional drag racers.
