

28320A

HIGH STRENGTH REVERSE CLUTCH RETURN SPRING

H I G H P E R F O R M A N C E T R A N S M I S S I O N P A R T S

FEATURES & BENEFITS:

- **Consistent and reliable transbrake release rate**
- **Longer life through better materials**

Part No.

28320A

17 Springs

PART SUMMARY

Improve the release rate of the transbrake-equipped Powerglide with the Sonnax high strength reverse clutch return spring **28320A**. Packaged in kits of 17 springs, all spring ends are close-wound to prevent arch deflection and then match ground to a uniform length to ensure equal load distribution among all the springs in the clutch assembly.

These springs are made from high tensile spring wire to slow loss from fatigue. Engineered by Sonnax specifically to meet the requirements of transbrake drag racers, these springs offer improvement over the OEM and any commercially available springs.
