

sonnax TRANSMISSION REPLACEMENT PARTS

**'97-UP MITSUBISHI & '99-UP
HYUNDAI "NEW GENERATION"
(F4A/5A 40 & 50 SERIES) PUMPS**

PUMP BUSHING & ALIGNMENT TOOL

Features & Benefits:

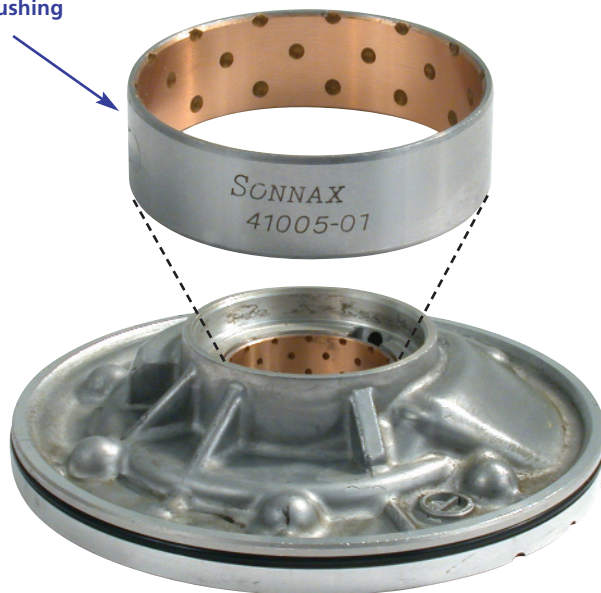

- Allows salvage of pump
- Bushing is not available from OEM
- Pump alignment tool properly aligns pump for assembly

Part No.

41005-01

1 Pump Bushing

Fits 40 & 50 series pumps only

Part No.

41005-TL

Pump Alignment Tool

PART SUMMARY

Sonnax offers replacement pump bushing **41005-01** for "New Generation" (40 & 50 series) pumps. This precision steel-backed, ball-indented bushing restores operational clearances for proper sealing and lubrication. **41005-01** has a full bearing surface with no cut-out to compromise bearing integrity. Correct installation requires staking the bushing into the pump housing.

The 40-50 series pumps are difficult to reassemble properly. There are no pins or mating features to ensure proper alignment of the pump halves. Sonnax offers pump alignment tool **41005-TL** to correctly align the pump halves during reassembly.
