AW50-40LE/42LE

PART NUMBER 59954-03K

& Sleeve Kit Features

59954-03K

1 Main Boost Valve 1 Main Boost Sleeve

Features & Benefits

- No special tools required.
- Sleeve is manufactured from highly wear-resistant billet aluminum.
- Valve is made of hard-coat anodized aluminum to prevent wear.
- Critical valve spool has been extended at each end, providing 30% more sealing surface.
- Annular grooves have been added to the valve to prevent side-loading and wear.

You need 59954-03K if...

A vacuum test of the sleeve assembly (while in the bore at the outboard reverse feed port indicated) gives less than 18" of vacuum, or if a Wet Air Test at the same location results in leakage at the neighboring EPC port. For more information on valve body testing procedures, go to **www.sonnax.com**.
