77911-03K

*2nd Gear "Super Hold"
Servo Assembly (Includes the
Servo Pin)*

Part No.

77767K

"Super Hold" 4th Gear Servo

Part Summary:

The Sonnax 4L60/4L60-E servo pin is longer than the longest OE pin. The extra length simplifies adjustment, eliminating the need for adding length to the pin. Made from Chrome-moly steel it is durable enough for high performance applications as well as stock replacement. Dual Teflon® seals have been added to improve sealing in the case bore and an o-ring has been added to improve sealing between the pin and the 2nd gear servo. The Sonnax servo pin is fully compatible with OE and aftermarket servos.
